

Springtime

Crassula

- **Chunky, triangular leaves** with a rough texture stack up on stems up to 6" tall
- **Charming flower clusters** bloom late winter to spring with clumps of lots of tiny, pale pink blossoms
- **Drought tolerant** and thrives in very gritty soil with infrequent, deep watering only when the soil is dry and the leaves feel less firm

Zone: 10 (30°F)

Bella Rouge

Echeveria

- **Neat green and red rosette** that has distinct lines like its *E. nodulosa* parent
- **Sun lover** that thrives on sunny windowsills where it can grow compact and vibrant
- **Water infrequently** and only when the soil is completely dry and the leaves feel less firm

Zone: 10 (30°F)

The Ultimate Succulent Club™

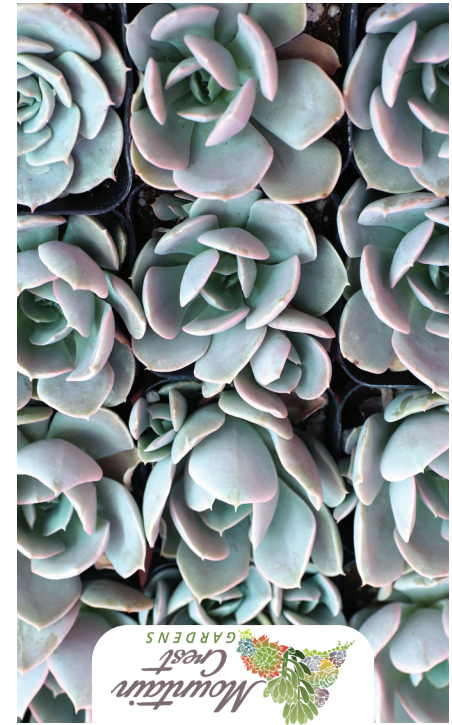

Morning Beauty

Echeveria

- **Pale blue leaves** verging on white that get a rosy pink blush at their edges when grown in bright sun
- **Compact rosette** that stays under 4.0" wide but is packed with wide leaves
- **Hybrid of mysterious origins**; possibly a naturally occurring form of *E. peacockii* or a cross of *E. cante* x *E. shaviana*
- **Sun lover** that tolerates drought; only water when soil is completely dry and leaves start to feel less firm

Zone: 10 (30°F)

The Ultimate Succulent Club™

Pink Edge

Echeveria runyonii

- **Classic beauty** with an ivory base color that blushes pink when gently stressed with full sun and drought
- **Sun loving plant** that thrives in full sun on a south facing window sill or outdoors in frost-free weather
- **Powdery coating of farina** protects the leaves in full sun and gives them a matte finish
- **Tolerates neglect well** and can easily go weeks without water

Zone: 10 (30°F)

The Ultimate Succulent Club™

Kalanchoe hildebrandtii *var. glabra*

- Robust, stemmed succulent that's easy to grow and adds height to arrangements
- Rounded, green leaves are thick, waxy, and slightly cupped
- Native to Madagascar where it can grow over 3' tall
- Adds height to arrangements and can grow tall silvery stems

Zone: 10 (30°F)

The Ultimate Succulent Club™

Ed Storms

Haworthia

- **Loose rosette** of green leaves that can flush reddish when gently stressed by direct sun
- **Long, narrow foliage** has flattened leaf tips that are speckled with white flecks
- **Translucent leaf tips** help the plant absorb more sunlight, even when grown indoors
- **Easy house plant** that thrives with rocky soil, neglect, and deep but infrequent water

Zone: 10 (30°F)

Elephant Food

Portulacaria macrophylla

- **Round, apple green leaves** contrast with flexible red to purple stems
- **Long, branching stems** spread over the ground in frost-free climates or overflow from indoor containers
- **Easy to grow variety** that thrives with rapid drainage, bright sun, and deep, infrequent water
- **Stands out in container arrangements**, contrasting with the color and form of other succulents

Zone: 10 (30°F)

The Ultimate Succulent Club™

Aureum

Sedum acre

- **Outdoor succulent** that makes an easy groundcover that tolerates temperatures down to -30°F (Zone 4)
- **Spreading groundcover** of short green stems covered with tiny leaves; moss-like appearance
- **A sea of yellow flowers** blooms through summer and attracts pollinators

Zone: 4 (-30°F)

The Ultimate Succulent Club™

Pink Butterflies

Kalanchoe x houghtonii

- **Variegated form of K. x houghtonii** that develops bubblegum pink highlights when grown in full sun
- **Mini, pink plantlets** sprout from its leaf edges and fall off to re-root and grow into more Pink Butterflies
- **Vigorous grower** that can develop tall, branching stems; good choice for succulent beginners

Zone: 10 (30°F)
