

Bronze Ingot

Sempervivum heuffelii

- Frost hardy outdoor succulent for low water, low maintenance gardening
- **Elegant rosette** that changes color seasonally between lavender, pink, and blue green
- **Bright white edges** outline leaf margins and give the plant a crisp look
- **Thrives in full sun** with deep but infrequent water through hot summers

Zone: 4 (-30°F)

The Ultimate Succulent Club™

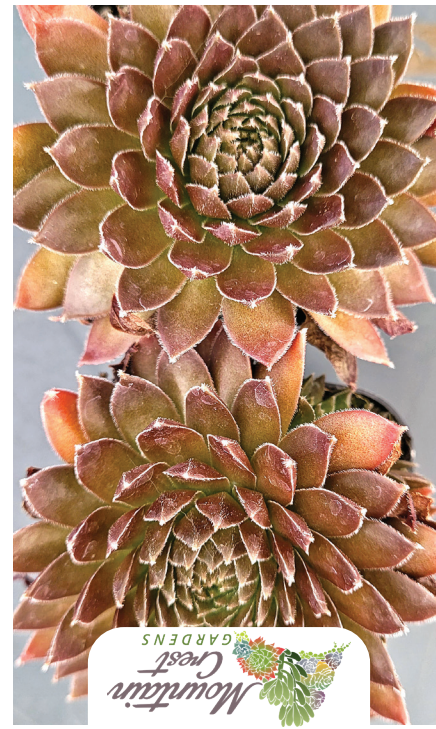

Jade

Sempervivum heuffelii

- Frost hardy outdoor succulent for dry, sunny areas of the garden
- **Pastel rosette** that shifts in color tone from lime to jade to blue green through the seasons
- **Drought tolerant** and thrives in rocky, well-draining soil with deep but infrequent water
- **Develops into a dense cluster** of tightly packed rosettes as it propagates through crown division

Zone: 4 (-30°F)

Bronze Pastel

Sempervivum marmorum

- **Metallic sheen** highlights seasonal color tones of red, orange, yellow, and green
- **Dense rosette** of tightly packed leaves with pointed tips and ciliated margins
- **British cultivar** released in 1953 by poet turned plant hybridizer, Nicholas Moore
- **Plant outdoors** in well-draining soil for vibrant colors and spring offsets ("chicks")

Zone: 5 (-20°F)

Weihenstaphaner Gold

Sedum kamtschaticum var. floriferum

- **Vigorous ground cover** that brings lushness to simple, drought-friendly landscaping
- **Spreads as long stems** covered with broad, green leaves with serrated edges
- **Tolerates hard frosts** by going dormant and losing leaves, which sprout anew each spring
- **Prolific yellow flowers** in summer that make a great food source for pollinators

Zone: 4 (-30°F)

Golddigger

Sedum sexangulare

- **Prolific ground cover** plant for an easy outdoor succulent garden or green roof
- **Mini leaves spiral up** short stems that spread slowly enough to be quite manageable
- **Vibrant yellow and lime tones** intensify in full sun and deepen to copper in winter
- **Blooms in early summer** with a sea of yellow, star-shaped flowers

Zone: 5 (-20°F)

The Ultimate Succulent Club™

Gold Nugget™

Sempervivum

- **Iconic cultivar** for its unbelievable color shifts between yellow, gold, red, and hot pink
- **Medium to large rosette** that can reach 5" wide and produce lots of new offsets each spring
- **Shows vibrant colors** in response to stress e.g. full summer sun and frosty winter nights
- **Outdoor succulent** that thrives in rocky, sandy soil with deep but infrequent water through summer

Zone: 5 (-20°F)
