

Ice Plant

Corpuscularia lehmannii

- Succulent shrublet with chunky, three-sided leaves and branching stems that can reach 6" tall
- Soft, blue-green leaves contrast nicely with rose pink stems and butter yellow flowers
- Tolerates more frequent watering than most succulent; leaves pucker and wrinkle when ready for water
- Blooms in spring / summer with large, many-petaled flowers that open in the morning and close in the evening

Zone: 10 (30°F)

S. stepeliiformis

Senecio stapeliiformis

- Oddity that grows tall, snaking stems with blue green striping
- Grows quickly and can sprout new stems from underground
- Matures into a sprawling pile of stems that can spill out of a container
- Vibrant, crimson blooms are composite clusters of mini flowers

Zone: 10 (30°F)

Bonsai Sedum

Sedum furfuraceum

- Natural, white crackling coats the leaves and gives a unique appearance; don't worry, it's natural!
- Jewel-like plant with beady leaves that spiral up branching stems
- Bronze and burgundy highlights emerge when grown in full sun
- Grows into a small shrublet that can easily be pruned and the cuttings re-rooted

Zone: 10 (30°F)

The Ultimate Succulent Club™

Ox Tongue

Gasteria glomerata

- Easy indoor plant that can tolerate lower light than most succulents
- Tongue shaped leaves stack up and form an impressive fan display
- Extra low water plant that tolerates extreme neglect
- Tubular, coral blooms can attract hummingbirds when kept outdoors in frost-free weather

Zone: 10 (30°F)

Chain Plant

Callisia navicularis

- **Trailing houseplant** that can grow long, sprawling stems over a foot long
- **Boat-shaped leaves** stack up on stems and flush magenta in bright sun
- **Hot pink flowers** bloom in summer and close at night
- **Tolerates more water** than standard succulents without rotting

Zone: 10 (30°F)
