

## Swan Lake

*Echeveria*

- **Angular, pointed leaves** curve outward from the center of the rosette and give it a unique, architectural look
- **Blushing pastel tones** of silver to lilac get a soft matte finish from a powdery coating of natural wax
- **Hybrid cultivar** (short for “cultivated variety”) of Echeveria ‘Topsy Turvy’ and E. shaviana
- **Thrives in bright light**, either on a sunny windowsill or outdoors in frost-free weather

Zone: 10 (30°F)

The Ultimate Succulent Club™

## Giant Blue

*Echeveria*

- **Large, ruffy rosette** of leaves that get wavier at their margins as they mature
- **Blue-green base coloration** that gets colorful accents of pink and orange in response to sun and drought
- **Grow in lot of direct sunshine** to keep this sun-loving beauty colorful and healthy
- **Mature specimens can grow tall** on a bare stem, but take well to “beheading” and re-rooting

Zone: 10 (30°F)

The Ultimate Succulent Club™

## Frizzle Sizzle

*Albuca Spiralis*

- **Collector’s variety of bulb succulent** that can be planted high with the top part of the bulb exposed
- **Curly, corkscrew leaves** sprout in response to autumn rains and die back during a dry, summer dormancy
- **Large, yellow flowers** bob and nod on a tall bloom stalk and release a rich, vanilla fragrance
- **For max curliness, give more sun** and less frequent water to model the South African species’s native climate

Zone: 10 (30°F)

The Ultimate Succulent Club™

## Tarantula

*Kalanchoe*

- **Spidery, twisting foliage** stands upright and can blush red at the tips in bright sunlight
- **Showy flower clusters** of pink to red can bloom spring or fall and attract pollinators
- **Thick, waxy leaves** help this plant tolerate drought; water deeply but only when soil is completely dry
- **Tall, low maintenance houseplant** that can grow into a 12.0” tall bush on a sunny windowsill

Zone: 10 (30°F)

The Ultimate Succulent Club™

## Topsy Turvy

*Echeveria*

- **Wavy, angled leaves** curve outward from the center of the rosette and give it a distinctive, elegant look
- **Pale, pastel tones** of silver to light blue get a soft matte finish from a powdery coating of natural wax
- **Stable “sport”** (morphologically distinct form) of the naturally occurring species *Echeveria runyonii*
- **Thrives in bright light**, either on a sunny windowsill or outdoors in frost-free weather

Zone: 10 (30°F)
